ESSEL®

Innovating Excellence

The art of shaping water flow!

CATALOGUE 2021-22

Volume II

22 years of bringing
excellence to the homes of
our esteemed customers.

ESSEL®

Innovating Excellence

...since 1998

Colin Powell said, "If you are going to achieve excellence in big things, you develop the habit in little matters. Excellence is not an exception, it is a prevailing attitude." Excellence is about being the best, striving to be better, with an eye to delivering quality goods and services.

INFINITY

limitlessness

The state or quality of being infinite.

At Essel we believe excellence is a continuous process. And to provide excellence we keep evolving and innovating. This has been the mantra and driving force behind our success for last 22 years.
Through our product innovations and superior service we have been able to provide best solutions and products to our customers.

Our products are associated with the flow of water. How over the years we have shaped it to provide that amazingly superior experience. We present our journey of shaping this flow of water through these pages. We will take you through our various collections that not only look a masterpiece but follow the best performance and durability parameters.

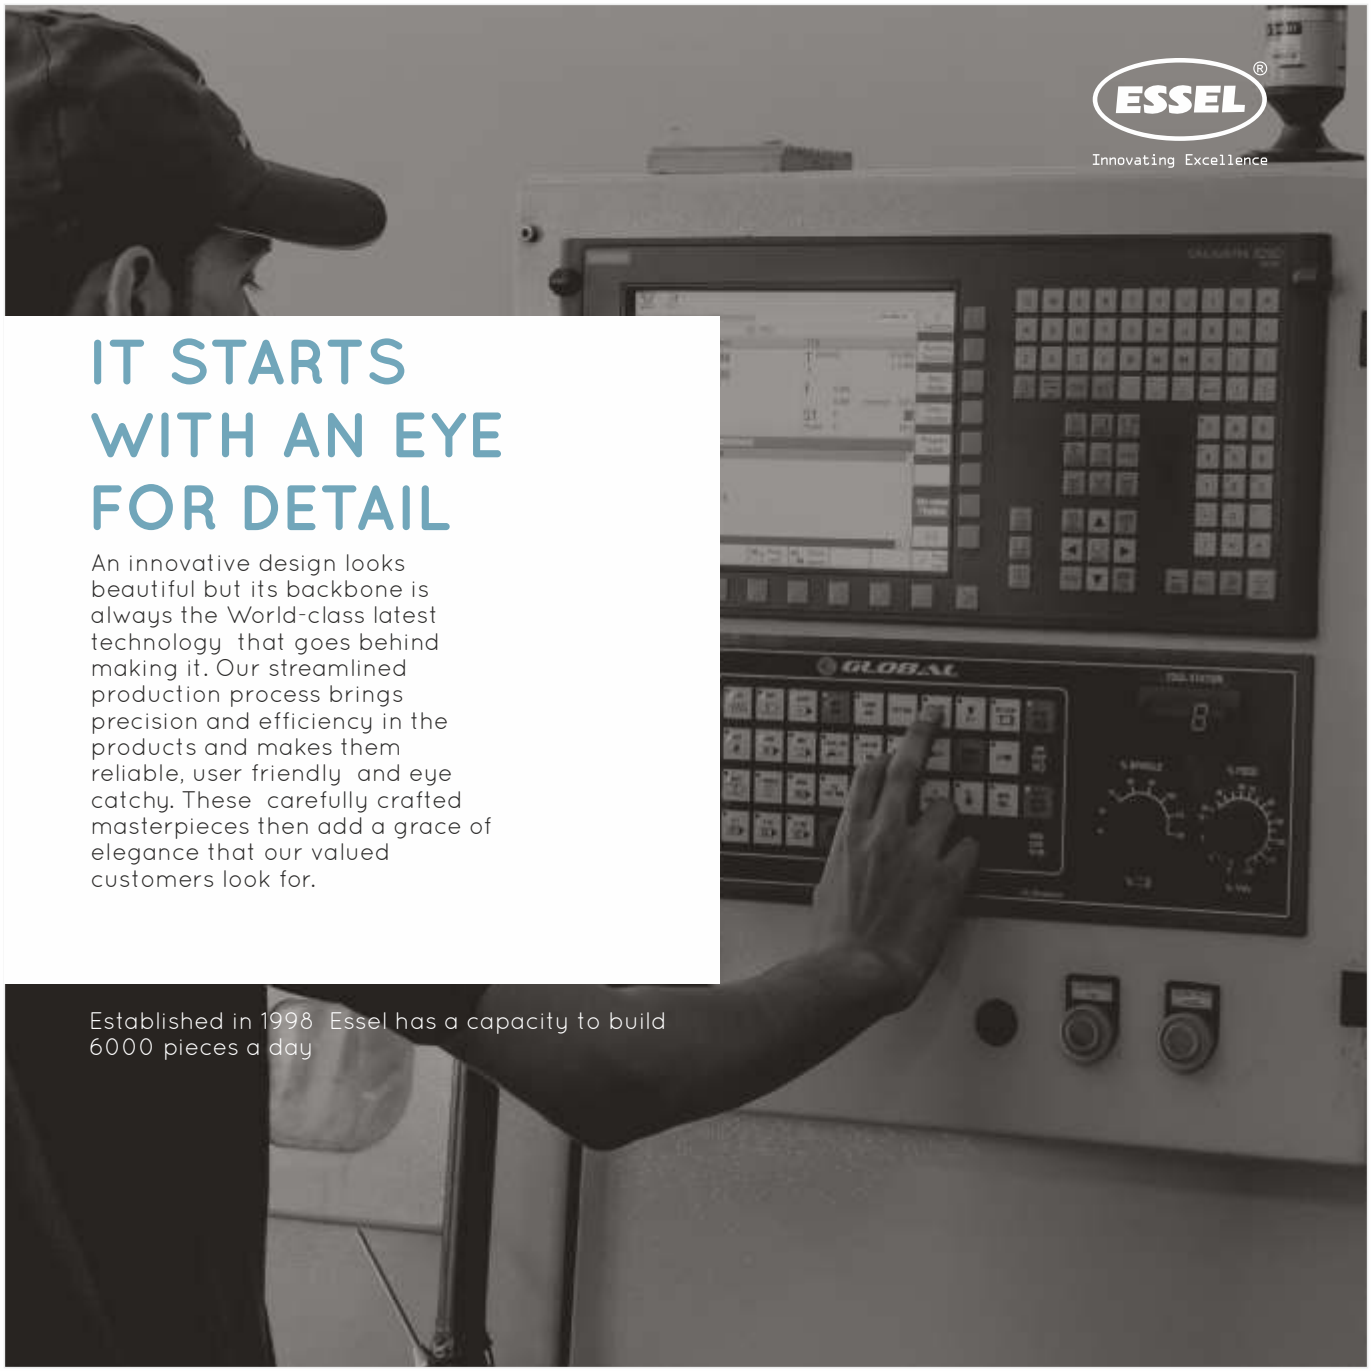

Essel manufacturing unit at Derabassi, Punjab (India)

World Class Production Facility

Quality assurance is the key to be amongst the leaders in the market. To ensure quality is maintained at every level, our world class production plant ensures every benchmark is met with finesse. From casting, mould making, grinding, polishing, electroplating to the final stages of testing and assembly our facility delivers one the best faucets and bath products in the market all under one roof.

Our research and marketing teams constantly study the changing dynamics of the market and consumer demands, so that new products and features are added to meet the requirements of the modern world.

IT STARTS WITH AN EYE FOR DETAIL

An innovative design looks beautiful but its backbone is always the World-class latest technology that goes behind making it. Our streamlined production process brings precision and efficiency in the products and makes them reliable, user friendly and eye catchy. These carefully crafted masterpieces then add a grace of elegance that our valued customers look for.

Established in 1998 Essel has a capacity to build 6000 pieces a day

ESSEL®

Innovating Excellence

THE PROCESS OF CREATING MASTERPIECES

The fully automated machines, state of the art mouldings and manufacturing provides extra strength. Deep rooted perfection is added through programmed software to ensure each part fits well and creates a fine experience for the end user.

Essel boasts of a dedicated R&D unit that keeps developing new products and ideas

ESSEL®

Innovating Excellence

Research and Development

Our company always strives to go beyond the expectation of the modern consumers and with our continuous research and development efforts, we continue to innovate and create the best for our consumers.

Our well equipped R&D facility boasts of high end & latest equipments, instruments and 3d Modeling design softwares to create designs and refine technical specification constantly.

Internal Technology

Cartridges

Cartridges are the mainframe of the every faucet and are responsible for control and flow of the water. Our cartridges are made to last and to ensure that our cartridges go through stringent tests. The cartridges are given a test of 5 lakh cycles to give a longer and a zero error operating life for upto 20 years. The material used is Engineering plastic which eliminates the problem of breakages. Such high quality materials guarantee smooth functionality even in high temperatures and various pressure conditions.

Aerators

Aerators are the revolutionary devices which mixes air with water to give a splash free flow. Our exclusive integrated Saniperl cascade structured aerators provides protection of lime buildup. Also, the in built anti-clogging feature integrated in the aerator filters all the sediments and dust particles

Terms and Conditions:

- Warranty period will start from date of purchase of the product and can only be availed if the valid proof of purchase and warranty card is shown to Authorized Service Personnel at the time of repairs. Customers are therefore required to keep original invoice and warranty card safely.
- For all products installed beyond the municipal limits of the jurisdiction of the company service centre / authorized service associate, the expenses incurred with regards to deputing the service personnel towards to & fro travel, conveyance and other incidentals will be born by customer.
- In the event of repair/replacement of any part/s of the unit, this warranty will thereafter continue and remain in force only for the un-repaired period of warranty.
- Company may at its discretion replace the faulty part (s) with functionally new operative part(s).
- In case of any damage to the product / customer abuse/ repairs by un-authorized personnel/ misuse detected/ by the Authorized Service Center personnel, the warranty conditions are not applicable and repairs will be done subject to availability of parts and on a chargeable basis only.
- Damage of any product or parts thereof due to any of the following causes will not be covered under this warranty.
  - Improper or wrong installation
  - Malfunction and damage caused by inappropriate care, wrong usage or modification of products
  - Normal wear & tear.
  - Chrome plating damage, Black/Green spots due to usage of Acids, Tile Cleaners, Detergents, Abrasive Cleaning Agents.
- In case of any dispute, this warranty is subject to jurisdiction of Chandigarh courts only.

Consumer Guidelines

In our constant endeavour to provide innovative and technically excellent products to our customers and to ensure optimum & trouble free performance of Essel products for years, we have evolved a set of consumer guidelines. These guidelines will ensure that you get the best out of your product.

The guidelines are:

- No. of bends in the pipeline should be kept to minimum. The water should travel straight & vertical as far as possible. More the no. of bends, more is pressure drop.
- The 25 mm pipeline should be used instead of 20 mm for better flow over a period of time when scaling reduces the diameter of the pipe.
- Supply lines should be provided with vent pipes to prevent air locking in pipes.
- For perfect foam flow of water, the aerators should be cleaned regularly.
- All the concealed fittings and pipeline should be tested at high pressure before plastering.
- The fittings should be cleaned regularly with normal soap or chalk powder to remove scaling/stains. Do not use strong acids, detergents etc.
- Use soft sponge or wet cloth for cleaning and do not use abrasive cleaning agents.
- Clean your overhead tank regularly.
- The center to center distance for hot and cold inlet for wall mixers should be maintained at 160 mm, in which case the wall mixers will fit easily.
- To protect the fine finish of products, cover them with cloth/polybag after installation, till they come to actual use.
- Buy Essel products from company's authorized dealers only.
- For any type of service or technical assistance, please contact nearest authorized dealer.

Customer Care Numbers
For any type of complaint, technical or service assistance, Please contact us:
